Product Description

Automated assembly systems for cosmetics caps automation solutions

Advantages:

Highly automated operation can significantly reduce the input of labor costs and improve the production efficiency of enterprises.
The equipment has reliable performance and can adapt to relatively harsh production environments such as high temperatures and dust.
The conveying process is stable and accurate, which can ensure the synchronous conveying of products and guarantee the accuracy of shell cover assembly.
It can effectively ensure the stability and consistency of assembly quality and reduce the unqualified rate of products.
The production process can be monitored in real time, problems can be quickly discovered and solved, which is conducive to improving the level of production management.

Typical industries requiring cap/closure assembly machines :

- Cosmetics
- Consumer Products
- Health Beauty Care
- Pharmaceutical
- Plastic Molding
