

Automatic Drilling And Chamfering Machine Batch Feeding Automatic Drilling Chamfering Reaming

Our Product Introduction

Basic Information

- Place of Origin: Shanghai
- Brand Name: QuanStar
- Certification: International Organization for Standardization
- Packaging Details: wooden box
- Payment Terms: letter of credit, T/T

Product Specification

- Function: Automate Assembly Process
- Capacity: High
- Plae Of Origin: Shanghai
- Application: Industrial Automation
- Highlight: **Automatic drilling and chamfering machine,
Batch feeding drilling and chamfering machine**

Product Description

Application Fields

The automated drilling and chamfering machine is widely used in machinery manufacturing, automobile manufacturing, aerospace, electronics, electrical appliances, instrumentation, toys, hardware products, and other industries. These industries have high requirements for processing quality, processing efficiency, and process cost savings, and the automated drilling and chamfering machine is an ideal choice to meet these requirements.

Advantages

High Efficiency: The automated drilling and chamfering machine adopts advanced servo motor drive and control systems, enabling rapid and precise drilling and chamfering operations, significantly improving production efficiency. Compared with traditional manual equipment, its processing efficiency can be increased by several or even tens of times.

High Precision: The equipment features a high-precision control system, ensuring stable processing quality. For example, the concentricity of drilling and tapping can reach within 0.01mm, and the depth precision parameters are adjustable, meeting the needs of high-precision processing.

High Stability: The automated drilling and chamfering machine is designed reasonably, operates smoothly, and is equipped with multiple safety protection functions, effectively avoiding operation accidents and improving production safety.

Labor Saving: The equipment can achieve fully automated operation, allowing one person to operate multiple machines simultaneously, significantly saving labor and reducing labor costs. At the same time, fully automated operation greatly reduces the operator's workload.

Strong Adaptability: The automated drilling and chamfering machine can adjust parameters according to different needs and is suitable for processing various materials such as metals and plastics. In addition, it can also process various pipe and bar materials, such as iron pipes, stainless steel pipes, aluminum pipes, copper pipes, plastic pipes, and various solid bars.

Easy Operation: The equipment has a generous and aesthetically pleasing appearance, a reasonable and compact structure, and simple and convenient operation. Even beginners can operate it smoothly. Some equipment adopts a PLC system for control, allowing operation through touch screen program input, with a high degree of intelligence.

Wide Range of Application Fields: The automated drilling and chamfering machine has been widely used in multiple industries such as automobile manufacturing, aerospace, new energy, precision electronics, hardware products, and machinery manufacturing, bringing significant economic and social benefits to enterprises.

Common Questions

Q: Are you a trading company or a manufacturer?

A: We are a manufacturer with over 10 years of experience in production and development.

Q: What are your main products?

A: We are a provider of assembly automation solutions, specializing in customized automation production machinery. For example, we provide customized assembly lines, testing, and packaging solutions for multiple electric vehicle (EV) manufacturers, such as component-level production lines for battery packs, thermal management systems, steering systems, etc.

Q: What is your delivery time?

A: Typically, 3 months is a production cycle, but the specific delivery date should be arranged based on the complexity of the product and the real-time production schedule. Please contact us for the latest delivery date.

Q: How about your prices?

A: Show us your parts, and we will be happy to find a solution, provide an appropriate plan, and offer you the most competitive price.

Q: What are your payment terms?

A: A 40% deposit is required before delivery, with the remaining 60% balance payable upon delivery.

Q: What is the packaging for your machines?

A: We use standard wooden crate packaging.

Q: What is the warranty period?

A: Our after-sales service includes one year of free warranty and guaranteed lifelong maintenance.

Q: Who do you cooperate with?

A: We can cooperate with customers' designated partners or recommend other component partners based on customers' requirements.
