

Automatic Plug in Machine For Electronic Components

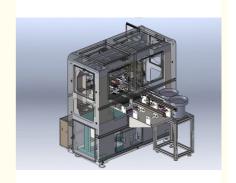

Basic Information

Place of Origin: Shanghai Brand Name: QuanStar

Certification: International Organization for

Standardization

Packaging Details: wooden boxPayment Terms: letter of credit, T/T

Product Specification

Product Type: Industrial Automation Equipment

• Plae Of Origin: Shanghai

• Highlight: Automatic Plug-in Machine,

Electronic Components Plug-in Machine

Product Description

Application Fields

Automatic electronic component insertion machines are primarily used in electronic product assembly and assembly scenarios, capable of assembling a variety of components including capacitors, transistors, push-button switches, connectors, coils, triodes, fuse holders, fuses, and more. Their end-use applications are wide-ranging, including electronics, home appliances, automotive electronics, consumer electronics, LED displays, medical equipment, and so on.

Functional Characteristics

Improved Production Efficiency: Automatic electronic component insertion machines can complete insertion tasks quickly and accurately, significantly enhancing the production efficiency of electronic products.

Cost Reduction: Through automated production, manual operations and labor costs can be reduced, while also lowering the costs associated with rework and scrap due to human errors.

Enhanced Product Quality: Automatic electronic component insertion machines offer high precision and stability, ensuring the accuracy and consistency of insertions, thereby improving the quality and stability of products.

Strong Adaptability: Automatic electronic component insertion machines can be adjusted and adapted to different types of components and PCB designs, meeting the production needs of various products.

Common Questions

- Q: Are you a trading company or a manufacturer?
- A: We are a manufacturer with over 10 years of experience in production and development.
- Q: What are your main products?
- A: We are a provider of assembly automation solutions, specializing in customized automation production machinery. For example, we provide customized assembly lines, testing, and packaging solutions for multiple electric vehicle (EV) manufacturers, such as component-level production lines for battery packs, thermal management systems, steering systems, etc.
- Q: What is your delivery time?
- A: Typically, 3 months is a production cycle, but the specific delivery date should be arranged based on the complexity of the product and the real-time production schedule. Please contact us for the latest delivery date.
- Q: How about your prices?
- A: Show us your parts, and we will be happy to find a solution, provide an appropriate plan, and offer you the most competitive price.
- Q: What are your payment terms?
- A: A 40% deposit is required before delivery, with the remaining 60% balance payable upon delivery.
- Q: What is the packaging for your machines?
- A: We use standard wooden crate packaging.
- Q: What is the warranty period?
- A: Our after-sales service includes one year of free warranty and guaranteed lifelong maintenance.
- Q: Who do you cooperate with?
- A: We can cooperate with customers' designated partners or recommend other component partners based on customers' requirements.
